by morning service at 11, at which time the Right Rev. George W. Peter-kin, D. D. Bishop of West Virginia, will preach, and by evening prayer at 6 o'clock, the new building of St. James Protestant Episcopal Church, at the corner of Franklin and Birch Streets, will be used to-morrow as a house of worship for the first time. For many years the old church at he corner of Fifth and Marshall Streets stood as a sturdy reminder of the missionary spirit of its congregation, for chapels and missions founded and nourished by its rectors and ascontinually by one congregation from the year 1837 until last October. Although the old structure was not

erected until 1837, the congregation was organized in 1831 by a party of churchmen who gathered together in that year for the purpose of considering the establishment of a church for the reason, as their quaint minutes read, that they deemed it "essential that there be an Episcopal church which might be conveniently attended by the dwellers in the extreme western end of Richmond."

colonnaded portico of the old building. It was also desirable to avoid the necessity of a Sunday school in the basement. Hence this section is built in the form of a wing connected with the church, but complete in itself, with two well-lighted stories above the ground, besides a basement containing choir rooms and other conveniences. The basement of the church proper is utilized for the heating plant, for the motors required for the operation of the three organs installed, and for other mechanical purposes.

The final service in the old church was held on the last Sunday in September 1912 at which time the Rev. the parish since 1896, spoke most in-terestingly upon the history of the congregation, and of its rectors and vestibules that open into the side

Since that time services have been regularly held in that room, even during the alarming illness of the greatly loved rector of the church, and the congregation has not only remained united, but has grown in numbers.

Architectural Fentures.

In considering plans for its new home, the rector and vestry discarded thus allowing space for a congregation of 300 or 1,000.

Pilasters, columns, cornices and an elaborately coffered ceiling, all in keeping with the style of the building, together add effectiveness to the pleasing appearance of the whole, while the semicircular form of the chancel not only increases the easy audibility of the preacher or reader and the choir, but seems to round the sanctuary into completeness. An arrangement by which electric lights shed a diffused glow through a circular outlet in the centre of the chancel gives comfort to the eyes of the congregation.

the eyes of the congregation.

The organ front was especially designed for the space that it occupies, and is painted to correspond with the general finish of the interior, which is white, with mahogany doors, pews, wainscot and other furnishings.

Graceful Spire Over Entrance. Probably the most striking feature of the exterior is the graceful spire over the entrance. Built of iron framing, brick and stone, it will remain a landmark for many years, particularly in view of the fact that so many of the steeples that were formerly seen in Richmond have been removed because of deterioration in their wooden structural parts.

Besides a large pipe organ of beau-

tiful tone, which was installed in the Sunday school room by S. W. Travers as a memorial to his late wife, and which has been in constant use during the occupancy of that room, the church is equipped with the two largest and most powerful organs in Richmond, all, including the Sunday school organ, the product of the Austin Organ Company,

of Hartford, Conn.
From the console in the chancel of the church all three may be played, the church all three may be played, though the memorial organ is also an entirely distinct unit with full keyboard equipment. All of these, though at considerable distances apart and from the console, speak practically simultaneously. The total cost of the buildings and furnishings is somewhat in excess of \$150,000. ## ITALIAN DIPLOMACY WINS GREAT VICTORY

Induces Sultan to Place Carmelite Monks Under Protection of Government.

BY LA MARQUISE DE FONTENOY. TALIAN diplomacy has just won a decided and important victory in honors passed to the second Earl of Constantinople. For it has induced Melville as his mother's heir, since the Sultan to issue an irade (decree)

by the terms of which the Carmelite monks in Turkey-a religious, order in Palestine than any other—are placed under the protection of the Italian government. Until the rupture of the concordat between the papacy and France, the latter claimed and exercised the protection of the various orders of the Catholic Church throughout the East, and was regarded by the Oriental governments as the protecting power. Lately, however, certain other European powers have been endeavoring to supplant France in this respect, and Italy has now succeeded as far as Palestine is concerned.

France has been able until recently to play an important role in connection with Turkey, Persia, etc., it has been precisely because she was cousidered as representing the interests of the Roman Catholic Church and of religious orders in the Orient. Italy has now managed to supplant her; at any rate, in the dominions of the Sultah.

Young Archibald Leslie Melville, twenty-three years of age, who has just become fifteenth Earl of Leven, and twelfth Earl of Melville, through the death of his elder brother, caused by injuries sustained in the hunting field, is a soldier by profession, and a fellow officer of Prince Arthur of Connaught in that famous regiment of Connaught in that famous regiment of Scottish cavalry, the Scots Greys. It is probable, however, that he will now sever his connection with the army in order to take charge of the banking interests of his family, which are very extensive.

His elder brother, the late earl, was member of the London banking firm of Huth & Company. His father was the principal partner in the London banking house of Melville, Evans, & Company, doing a large American business, which Fickus brought him frequently across the Atlantic; while the new earl's grandfather, the eleventh Earl of Leven, was one of the chief partners of the banking house of Williams, Deacon, Labouchere, Thornton & Company.

Sir Evelyn has published a number of volumes of interesting reminiscences, and also many review and magazine articles, his pen being, indeed, most prolific. But not a word has he ever written or spoken to exculpate himself of the responsibility for a surrender that has always been regarded as a disgrace to British annals in South Africa, and as the source and origin of all subsequent troubles.

It has remained for Sir Ralph Williams, the recently retired Governor liams, the recently retired Governor Secretary of the Treasury.

Sir Evelyn strongly dissented from their views, opposed the surrender, and sent in a minority report in which he de-nounced the yielding to Boer demands as not only impelitle in the extreme, and productive of future trouble, but also as an irreparable blow to British prestige in that part of the Dark Continent.
